Frontend Developer

RESUME OF QUALIFICATIONS

I started in development with Python around 2017 when I got my first computer. I started at Frontend development in 2022 when I started learning technologies and languages like HTML, CSS, Javascript, Typescript, React, NextJs, VueJS, Bootstrap, TailwindCSS, SASS, Less, Gulp, Grunt and Cypress. I'm a fast learner who likes to let people around comfortable. I have critical thinking, good communication and working under pressure. I'm looking for a first opportunity at the market and an opportunity to improve myself both personally and professionally.

ACADEMIC EDUCATION

- System Analysis and Development - College - Anhanguera - 09/2023 - 02/2026
